Guide #1 USB Potentiostat Installation

- 1 Insert installation media and click **Install Software**.

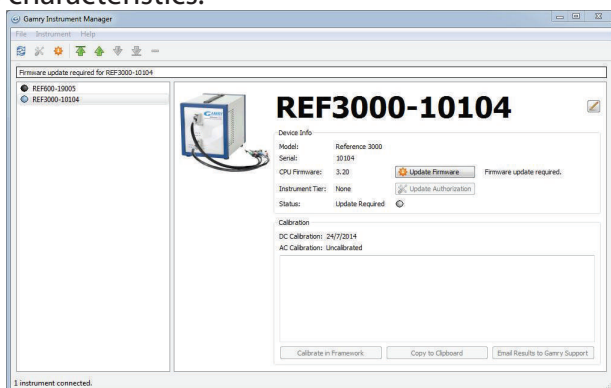

- 2 The Gamry Software Installation program runs.

NOTE: If you have Gamry software previously installed, you are asked to remove previous versions of the software and the Gamry device drivers. Click **YES**; all previous data are saved.

- When asked to select folder location, click **Next**.
- Follow prompts to finish installation. Restart your computer.

- 3 Turn on potentiostat and plug in USB. Microsoft Windows® detects your potentiostat, and a **Found New Hardware** prompt appears. If necessary, select **Install Software Automatically**.

- 4 Open the Gamry Framework™. Gamry Instrument Manager software automatically opens, showing the new instrument and its characteristics.

5

To change the label of an instrument, click on the pencil icon next to the instrument's label.

6

Close the Instrument Manager.

7

After a moment, your potentiostat should appear next to **Devices Present** along with a green virtual LED. Repeat for additional potentiostats.

8
